Automated Flight Following User Guide

Automated Flight Following (AFF) is an online government application that automatically tracks the location and velocity of specially-equipped aircraft and mobile assets and provides this information in near-real-time to dispatchers, aviation managers, and other authorized users.

Automated Flight Following (AFF)

AFF is GPS-based computer software first developed in 2000. Using a map-based interface, an authorized user can identify, view, and monitor the location of government-registered aircraft, in the air or on the ground. AFF can automatically track specially equipped aircraft, providing location and velocity information in near-real-time to dispatchers and aviation personnel.

AFF Help - Automated Flight Following (AFF)

Automated Flight Following (AFF) is a system that automatically tracks the location, altitude, course and speed of aircraft, providing this information in real time to authorized users. How does it work? In a nutshell, there is a GPS unit onboard the aircraft which collects data on position, altitude, bearing and speed as long as it's turned on.

A-115 Automated (Satellite) Flight Following (AFF) www.aff

1. Visit app.spidertracks.io and log in with your email and password, then click on the 'Admin' icon.
2. Select the organisation that you would like to set up an AFF feed.
