Introduction. In this article we list the main schools and styles of "Contemporary Art" which emerged from the late-1960s onwards. Because "contemporary art" superceded "modern art", it is also referred to as Postmodernist Art. Please note however, that the transition from modernism to postmodernism was a gradual one, which took place during the decade of the 1960s.

Sculpture is the branch of the visual arts that operates in three dimensions. It is one of the plastic arts. Durable sculptural processes originally used carving (the removal of material) and modelling (the addition of material, as clay), in stone, metal, ceramics, wood and other materials but, since Modernism, there has been an almost complete freedom of materials and process.

The Sun is the star at the center of the Solar System. It is a nearly perfect sphere of hot plasma, heated to incandescence by nuclear fusion reactions in its core, radiating the energy mainly as visible light and infrared radiation. It is by far the most important source of energy for life on Earth. Its diameter is about 1.39 million kilometres (864,000 miles), or 109 times that of Earth.
