Because power steering fluid is very flammable, replacing the power steering hose is a job you should only undertake when the car engine is completely cold. If some of the fluid lands on a hot exhaust manifold, you could end up with a fire. If the engine is hot, the result will be the same. It's safer to wait an hour or 2.

But there's an easier and less expensive way to fix a power steering hose leak. Use S.U.R. & R. hose repair kit. S.U.R. & R. makes hose repair kits that allow you to replace just the leaking portion of the power steering line. That means you don't have to fight to remove the fittings at the steering rack, pump or cooler. Just cut the power steering line at both ends near the crimp connector. Remove the leaking hose and replace it with a new section.
