Slow River by Nicola Griffith - Goodreads

"Nicola Griffith made a brilliant debut two years ago with the planetary exploration novel Ammonite. Her second book is an equally brilliant but very different story of the near future and one woman's search for an identity. Slow River extrapolates changes in biology, computers and drugs in the day-after-tomorrow fashion of Bruce Sterling.

Slow River is science fiction: it's set in the near future and the plot revolves around a technology that is (still) in its infancy. Griffith's prose, like the "slow river" she describes in the opening chapter, is smooth and languid on the surface, but has hidden depths that slowly rise as the story continues. The structure of the story is excellent; the use of different tenses and points of view (Lore is always the viewpoint character, but sometimes first-person, sometimes third-person) is smooth and never confusing.
