### Technics Sb M1000 Loudspeaker Original

The SB-M10000 used dual dynamic drives that achieved flat response down to super-low frequencies. By developing a Kelton speaker system that alone is capable of the advantages of both sealed speakers and bass-reflex speakers, the SB-M10000 achieved ample frequency response reaching down to deep bass. The speaker was capable of easily reproducing deep bass with a sense of natural and magnificent scale as if floating.

### **Technics Vintage Speakers for sale | eBay**

Technics' newly developed flat coaxial two-way speaker unit combines a tweeter for high frequencies and a woofer for mid-range and bass. Because the tweeter is at the center of the woofer, the speaker acts as a point sound source, providing a coherent, integrated sound across the frequency range, without directional anomalies.
